## OUR MISSION

*" To be the innovative technology provider of choice and be the agents of digital transformation for businesses across the globe by aligning with creative professionals keeping integrity at the core.. "*

## OUR VISION

*" We aim to continually evolve with the trends of information technology space, collaborate with intuitive minds to deliver quality-driven and industry leading solutions worldwide, in pursuit of narrowing the digital-divide.. "*

## OUR VALUES

### TEAM OF **PROFESSIONALS**

To attract, nurture and retain the best minds, challenging them to excel in an environment that breeds collaboration, support and driven by human values.

### **CUSTOMER** VALUE CREATION

Enabling customers to evolve into high-performance businesses and creating long-term relationships by being responsive, relevant and quality - driven.

### CONSORTIUM OF **EXPERTISE**

Leveraging and tapping on to the power of 'niche' and 'expertise' of our partners and collaborating with them to provide value-driven business.

### INTEGRITY

Being ethically unwavering, honesty and integrity at the core, inspire trust by delivering on commitments.

### DIVERSITY

We believe in "Unity in Diversity", carrying passion to work with different set of people, creative ideas, innovative interests and inspiring cultural backgrounds to foster an environment that breeds success.

# ABOUT

US

Sun Plus Software Technologies is a global information technology development and consulting firm founded in 2011 and headquartered at Bangalore, India.

We develop and deliver modern business solutions aided by cutting edge technologies to empower various key sectors that includes - **Healthcare, Education, Government, BFSI and several others.**

At Sun Plus, we take great pride in working with disruptive technologies with the sole intention of helping our Customers achieve technology-driven business transformation through solutions that are cutting-edge and sustainable.

## ENTERPRISE **PORTAL** DEVELOPMENT

Enterprise portal development services cater to all business needs related to collaboration, accessibility, seamless information delivery and business process automation that are aligned with customer specific requirements. We work with market-leading and quality development frameworks to develop integrated and personalised web solutions that enriches the end user experience.

## ENTERPRISE **DOCUMENT** MANAGEMENT

Our secured cloud based solution is a collection of technologies that work together to provide a comprehensive solution for managing the creation, capture, indexing, storage, retrieval, and disposition of records and information assets of the organisation that minimise data-loss, eliminates human errors risks, and improves collaboration and productivity. The solution is secured, scalable and is capable of meeting various compliance requirements.

## ENTERPRISE **MOBILITY** MANAGEMENT

Enterprise Mobility solution allows to keep a greater control on employee productivity without compromising on corporate data security through a simple, easy to use interface that streamlines the task of managing employees' mobile devices supporting the leading mobile operating systems such as Android, iOS and Windows.

## **IOT** SOLUTIONS

We work on seamlessly integrating data from various connected systems and present the same in a structured manner through tailor made applications. Our IoT consulting spread encompasses - Smart Cities, Smart Buildings, Smart Energy Management and Smart Manufacturing.

## **BLOCKCHAIN** SOLUTIONS

Our qualified pool of resources with the knowhow of the technology, enables us to offer services related to Blockchain App Development and Decentralized Application Development to our clients.

## **ERP & CRM** CONSULTING

ERP & CRM expertise can help you to identify and implement the right ERP solutions that centralize organizational data, aligns operational processes and streamlines complex reporting to provide the competitive business edge to customers.

## **AUGMENTED & VIRTUAL REALITY (AR/VR)**

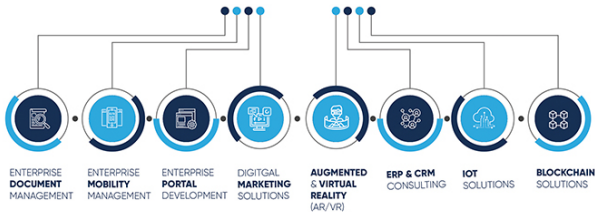

Creating world class interactive AR+VR+MR experiences by collaborating with leading industry experts to enhance the value across myriad of domains. We leverage relevant technologies to provide cutting edge augmented reality experiences and solutions.

## **DIGITAL MARKETING** SOLUTIONS

On the Digital Marketing front, Sun Plus provides end-to-end services. Whether you're looking for a turnkey managed strategy, an independent audit, or services specific to a short-term campaign, our experience and approach are sure to prove to be a valuable asset.

OUR  
**TECHNOLOGY  
SOLUTIONS**

## MANAGED INFRASTRUCTURE SERVICES

Our team of experts are constantly monitoring your IT infrastructure, using enterprise grade tools, proactively identifying and fixing faults much before it impacts business. We offer a comprehensive and integrated suite of remotely managed services to on-premise or outsourced data centres. The Services are offered with guaranteed Service levels in a Global delivery model aligned with ITIL framework of best practices covering all aspects of service support and service delivery and manage next generation IT infrastructure.

## HYPER-CONVERGED INFRASTRUCTURE

The growing demands of enterprise applications can put separate servers, storage networks and network arrays at risk of a failure. This is where we step in to provide you with a single hyper converged infrastructure solution that makes your data centre resilient and agile that can easily scale with business.

## DEVOPS

With our DevOps as a service offering, we ensure rapid on-boarding of applications by automating end-to-end delivery pipeline and facilitate continuous integration and development across leading cloud platforms. We align Development and Operations team to achieve higher efficiency, faster time to market and better quality of software builds with early identification of emerging issues, letting the code be in a releasable state always.

## PERFORMANCE AND CAPACITY MANAGEMENT

Our expertise and processes help you to ensure that information technology resources are right-sized to meet current and future business requirements in a cost-effective manner. The capacity management process works closely with service level management to ensure that the business' requirements for capacity and performance can be met.

## CLOUD CONSULTING

Our cloud professionals help organisations to realise business objectives into real execution road maps, based on individual, department-specific, or enterprise-wide requirements and a guided assessment of the current state. We have tied up with world class Cloud Application vendors to cater to all of your cloud related requirements.

## WEB DEVELOPMENT

A professional team of skilled developers in web development and designing who can help capture the ideas and translate them into reality, starting from static pages to dynamic and complex intranet or internet based applications. We offer a suite of services that include, Web Portal Development, MEAN Stack Development, SEO, Responsive Web Designing, E-Commerce Websites, etc.

## APP DEVELOPMENT

Our team covers the entire app development cycle based on customer requirement across leading mobile platforms. We help you build a complete solution that creates new value for business, quickly develop clickable prototypes and ready-to-deploy software applications for any platform that aim to streamline workflow, integrate functions into one seamless pattern, and in turn increase the productivity of a business enterprise.

## SOFTWARE TESTING (QA)

Our engineers are specialised in different testing methodologies and tools that allows us to deliver a defect free web and mobile application experience.

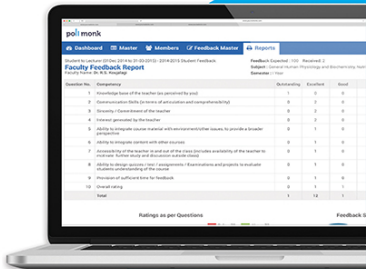

## OUR PRODUCTS

Poll Monk is a universal survey application that provides an online platform to create surveys, automate response collection and report generation for myriad of domains; it offers one of the most advanced comprehensive feedback tools that allow users to extract more out of their surveys, empowering quick decisions.

# poll monk
